General information about the Nasmans Library

- [Introduction](#)

Introduction

Welcome to the Nasmans Library.

This is the place where I curate and store my eBook collection. You can just create an account yourself and then use it to browse and download books, or to curate your own collections (shelves) and sync Kobo eReaders.

I think that's pretty much it. On the shelf above this book, you'll find a really comprehensive manual on how to sync Kobo eReaders to the Nasmans Library. I wrote this guide before the Wiki existed, so it may contain some duplicate information.

You can find more information on the frontend of the library [here](#).
