Generic FAQ

These are the most Frequently Asked Questions that don't really belong in any other pages or that should be easily accessible.

Q: Why is <service> slow to load?

A: Well, all of Nasmans is pretty much run on a ten year old potato. It's actually pretty underspecced for what it does. It works though! Just have a little patience. Hardware is expensive, so I make do with what I can get/afford.

Q: What are the "Apps" at the bottom of the page?

A: If you have to ask, they're probably not for you. They're listed here for ease of access/administrative purposes.

Q: Can you get<service> too?

A: Currently, no. The current setup is kind of pushing the hardware to its limits. I don't currently have the storage, nor the performance to really expand the possibilities. Maybe in the future.
