

# 2025-02-01 - More Storage

Hi!

You may have seen some new content appear on the different services. This is now possible because, even though I experienced a lot of setbacks, I managed to expand my storage a bit. It's not a lot, so it won't last forever (or probably even 'till the end of the year), but it's something.

Expanding the storage pool does not mean I have the resources to blindly accept every request I receive, but as always, I'll try to get something for everyone using the services consistently.

Lastly, I'm still (probably always) experiencing a "drought" of hard disks. If you have anything you wish to part with for a fair price/trade ( $\geq 6\text{TB}$ , CMR, 512e, SATA), please let me know!

Kind regards,

L
