

# Setting up Calibre-Web for use with your eReader

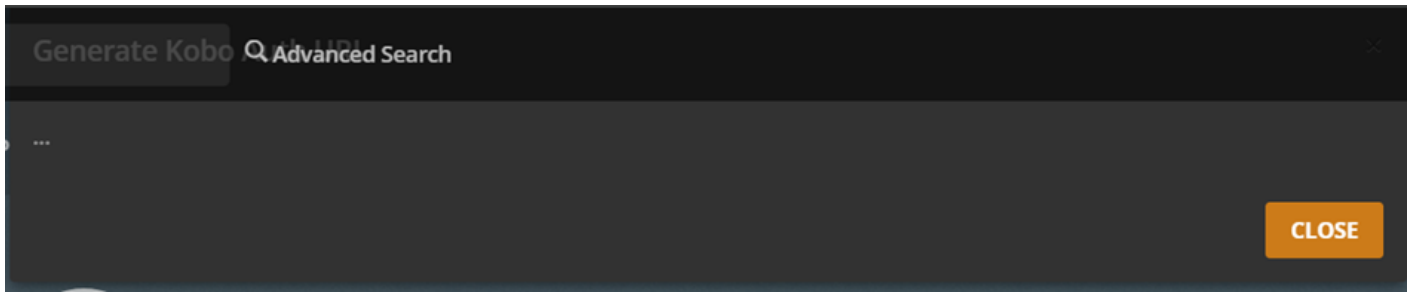

1. Go to your personal settings menu as explained in the previous paragraph.
2. **THIS STEP IS EXTREMELY IMPORTANT. DON'T SKIP THIS.** In your personal settings menu, there is a checkbox that has not been checked by default. It's titled "Sync only books in selected shelves with Kobo". **CHECK THIS BOX!!!!** If you don't check this box, your device may try to sync all books in the collection (currently ~13K). This **WILL** crash your eReader and may even crash the website.

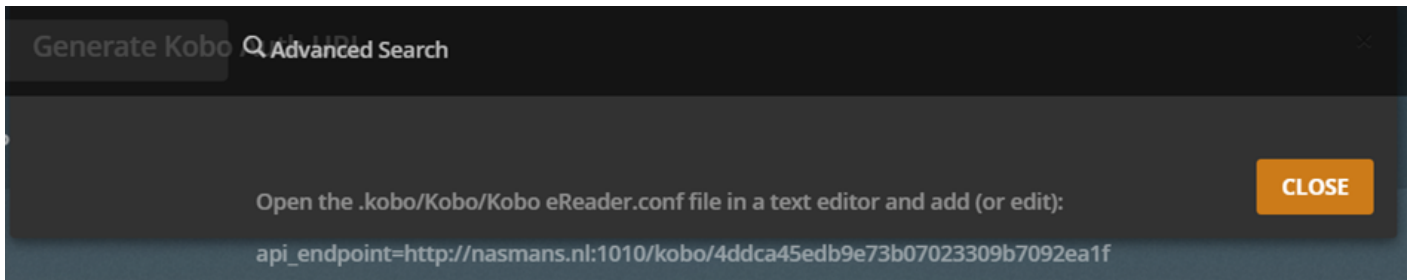

3. Press the orange "SAVE"-button at the bottom of the page.
4. Press the "CREATE/VIEW"-button under "Kobo Sync Token"

5. A seemingly empty popup will appear at the top of the webpage. It'll just be populated by three dots at first. Don't close it! It will take a while to generate a token.

6. After about twenty seconds, the popup will display a strange string of text. In the current version of Calibre-Web there is a small issue with the layout, which may make it hard to read. Copy the complete string and paste it somewhere safe.

- 7. Close the popup and press the “SAVE”-button at the bottom of the page again.
- 8. NEVER share your sync token with anyone. It’s a security risk. Don’t bother with the token pictured above, it’s been deleted. The basics of Calibre-Web have now been set up for your eReader.
